

Chapter 3 - System Analysis

The Si View Metro Parks system contains seven parks ranging from less than 10 acres up to over 400 acres (**Figure 31**). However, given the nature of Si View Metro Parks, there are other public parks and open spaces that serve the area. The City of North Bend, Seattle Public Utilities, King County, and other state lands are all easily available to district residents. Additionally, the district boasts a good network of regional and backcountry trails, with future connector points already identified (**Figure 32**).
