All about cells and DNA! Biology Camp

NEW

Come explore the micro world of cells and DNA! This summer camp is led by a middle school science teacher and is geared towards exploring biology. Summer camp students will gain invaluable experience with microscopes. Students will learn through interactive lessons and activities (i.e. creating models of both eukaryotic and prokaryotic cells and DNA), application (i.e. proper use of microscopes), and other labs (i.e. extracting DNA). The week is packed with biology exploration that will help students excel in science and gain interest in the area of biology. There is a \$30 supply fee that will be paid to the instructor for the use of microscopes.

Math Patterns and Measurements Camp

NEW

Come explore math with hands on activities! This summer camp is led by a middle school math teacher and is geared towards exploring mathematics. Summer camp students will learn about math patterns and measurement. Students will explore patterns all around us in art (i.e. tessellation patterns) and nature (i.e. Fibonacci). Students will explore math measurements with length (i.e. estimating lengths of objects), distance (i.e. racing cars), and volume (i.e. play doh to measure volume of cylinders and cones).

Big Flips Gymnastics Camp

Learn gymnastics or improve your current gymnastics skills. Our grade school camp provides basic to intermediate gymnastics training. Gymnastics builds strength, balance, coordination, flexibility and confidence, a valuable athletic foundation to excel in a variety of sports. Each student will experience gymnastics including tumbling, bars, beam and vault progressing at his or her own level. Classes are non-competitive and focus on general fitness, self-esteem, and fun. We accommodate all skill levels in our camps and teach to the ability level of each boy or girl.

Parkour Camp

Parkour is a non-competitive physical discipline of training to move freely over and through any terrain using only the abilities of the body. Principally through running, jumping, climbing, and specialized movement. In practice we focus on developing the fundamental attribute required for such movement, which include functional strength and fitness, balance, spatial awareness, agility, coordination, precision, control, and creative vision.

Pre-Engineering using LEGO

Let your imagination run wild with tens of thousands of LEGO®! Build engineer designed projects such as boats, bridges, mazes and motorized cars, and use special pieces to create your own unique design! Explore the endless creative possibilities of the LEGO® building system with the guidance of an experienced Play-Well instructor. This is an ideal way to prepare young builders for the challenge of Engineering FUNDamentals.

Art and Architecture using LEGO

Explore the great works of art and architecture through LEGO! Collaborate in small groups to build grand structures such as the Parthenon in Greece, the Notre Dame Cathedral in Paris, the tree houses of Papua New Guinea, and New York's Empire State Building. Follow in the footsteps of master artists with LEGO interpretations of sculptures, mosaics, and stained glass. Teamwork and creativity take high culture to the next level!
