

Virtual Waiting Room

Our registration system [Dash](#) has a new feature: Virtual Waiting Room. During peak registration periods, you may briefly see a virtual waiting room before accessing the Customer Portal online. This virtual queue keeps things working well for everyone by managing traffic, so pages stay responsive and registrations complete successfully.

When you are directed to the waiting room, you are **not redirected to a new URL**, but you will see **Cloudflare branding** instead of Dash branding. **This is expected**

r.

When in the virtual waiting room, please note:

- **You're in Line.** The waiting room is a fair, orderly queue (First-In, First-Out).
- **Do Not Refresh or Close the Tab.** Refreshing or closing the browser will send you to the back of the line.
- **Estimated Wait Time.** An approximate wait time will be displayed.
- **Automatic Entry.** When space becomes available, you'll be redirected to registration automatically.
- **A Better Experience Once Inside.** The wait ensures the site stays fast and functional when you enter.
